PROFESSIONAL SUMMARY

Backend Developer with 3+ years of experience building scalable REST APIs and distributed systems using Node.js and TypeScript. Experienced in designing microservices, integrating third-party APIs, implementing authentication systems, and optimizing database performance. Strong understanding of system design, caching, and rate limiting in production environments.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python
Backend: Node.js, Express.js, Fastify
Databases: PostgreSQL, MongoDB, Redis
ORM/ODM: Prisma, Mongoose
Cloud & DevOps: Docker, GitHub Actions, Nginx
Architecture: REST APIs, Microservices, JWT Auth, Rate Limiting
Tools: Git, Postman, VS Code
AI Integrations: OpenAI API, Groq API

PROFESSIONAL EXPERIENCE

Backend Developer

TechNova Solutions Pvt Ltd — Mumbai
June 2022 – Present

- Designed and deployed scalable REST APIs using Node.js and Express serving 50K+ monthly users.
- Implemented Redis-based rate limiting to protect AI endpoints and prevent abuse.
- Optimized PostgreSQL queries reducing response time by 35%.

- Built JWT-based authentication and role-based authorization system.
- Integrated payment gateway APIs and webhook handling.
- Containerized services using Docker for consistent deployment.
- Implemented caching strategies using Redis, reducing database load by 40%.
- Designed retry logic and fault-tolerant API integrations with third-party services.

Junior Backend Developer

CodeForge Labs — Pune
Jan 2021 – May 2022

- Developed internal APIs for HR and inventory systems.
- Worked with MongoDB and Mongoose for schema design and data modeling.
- Assisted in migrating monolithic application to modular service-based architecture.
- Wrote automated tests improving code coverage to 85%.

PROJECTS

AI Resume Evaluator API

- Built an AI-powered resume scoring backend using Groq LLM API.
- Implemented exponential retry logic for fault tolerance.
- Added per-user rate limiting using Redis.
- Designed JSON-based structured evaluation pipeline.

SaaS Inventory Management System

- Multi-tenant backend with role-based access control.
- Implemented caching and pagination for performance.
- Used Prisma ORM with PostgreSQL.

EDUCATION

Bachelor of Engineering in Computer Science
University of Mumbai
2017 – 2021

CERTIFICATIONS

- Backend Development with Node.js
- Docker & Kubernetes Fundamentals
- System Design Basics

KEY ACHIEVEMENTS

- Reduced API latency by 40% through optimized indexing.
- Designed scalable AI usage tracking system preventing cost overrun.
- Led backend refactor improving maintainability and modularity.
